

Mahesh

Senior Data Engineer | Microsoft Fabric | ADF | Databricks | PySpark | Azure Data Lake | SQL | Power BI

✉ sharmamahesh216@gmail.com ☎ +91 8607458275 📍 Hyderabad, Telangana

Skills

Data Engineering:

ETL/ELT, Azure Data Factory, Storage Account, Data Warehousing, Data Quality, Data Governance, Performance Optimization, Microsoft Fabric, Azure Integration

Microsoft Fabric:

Data Factory, Lakehouse, Semantic Model, Warehouse, Notebook, Mirroring, Dataflow Gen2, Power BI, Medallion Architecture

Big Data:

Databricks, PySpark, Delta Lake, Spark SQL

DevOps

Azure DevOps, GitHub, CI/CD

Education

Panipat Institute of Engineering and Technology

Master Of Computer Applications
2021

Arya P.G. College, Panipat

Bachelor Of Computer Applications
2018

Certifications

Implementing Data Engineering Solutions Using Microsoft Fabric

June 2026

Organize a Fabric lakehouse using medallion architecture design

June 2026

Data Integration: Fabric Data Factory - Mirroring (L300)

June 2026

Administer a Microsoft Fabric environment

June 2026

Implement continuous integration and continuous delivery (CI/CD) in Microsoft Fabric

June 2026

Summary

Data Engineer with 5 years of experience delivering enterprise-scale data integration solutions across Microsoft Fabric and Azure ecosystems. Skilled in ETL/ELT development, Azure Data Factory, ADLS Gen2, Databricks, PySpark, SQL, and Power BI, with expertise in pipeline orchestration, performance optimization, and data platform architecture.

Experience

Microsoft

Aptly Solutions, LTIMindtree, Teamware

Azure Big Data Engineer

July 2023 - Present

- Successfully contributed to the go-live of 30+ enterprise data integration and analytics projects for Philips, leveraging Azure Data Factory and SAP integration.
- Collaborated with Optum's client to improve pipeline orchestration efficiency by 30%, optimizing ETL/ELT workflow execution, monitoring, and operational reliability.
- Supported HDFC Bank in enhancing data workload performance by 20% through workload optimization, query tuning, and performance troubleshooting.
- Designed, troubleshoot, supported and optimized large-scale analytics and data integration workloads across Microsoft Fabric, Azure Data Factory, Azure Data Lake Storage Gen2, Azure SQL, Power BI, and cloud-native data platforms.
- Enabled customers to implement Azure DevOps and Git-based CI/CD frameworks, including deployment automation, source control strategies, release management, and DataOps best practices for enterprise data platforms.

Fifthnote - An Ensemble Health Partners

May 2022 - April 2023

Data Engineer

- Developed, tested, and validated ETL pipelines to support enterprise reporting and analytics requirements.
- Performed data validation, SQL-based testing, and issue resolution to ensure reliable and accurate data processing.
- Collaborated with cross-functional teams to implement business rules and improve data integration workflows.

Codequotient (Client - Fifthnote - An Ensemble Health Partners)

May 2021 - April 2022

Data Engineer

- Gained hands-on experience in smoke, regression, and performance testing of enterprise application & ETL workflows.

Databricks Fundamentals June 2026
Accreditation

**Academy Accreditation - Azure
Databricks Platform Architect**
June 2026

- Developed SQL queries, stored procedures, and business logic while supporting database design and data validation activities.
- Assisted in ETL development, troubleshooting, and production support to ensure data quality and process reliability.

Interests

- Gardening**
- Cooking**
- Mentoring**

Projects

- **Enterprise Intelligent Retail & Supply Chain Analytics Platform**
June 2026
 - Designed a Medallion Architecture (Bronze, Silver, Gold) using Microsoft Fabric.
 - Developed PySpark notebooks and Data Factory pipelines for automated ingestion and transformation.
 - Built Power BI semantic models and dashboards to support inventory and supply chain analytics.
